

MAP TRACKING PATTERN

THERE ARE TWO WAYS TO READ AND USE THE MAP TRACKING PATTERN

1. If you want to find out what attendance area your address is in, find your location on the map and note the number of the area. Find the corresponding area number at the left hand margin of the Map Tracking Pattern. The school assignments are read across, left to right. Find the grade that concerns you at the top of the page; the school assignment for that particular grade will be found in line with your area number.

For example, for area #13, the area number can be found in the grid of ML-21 on the map. On the Map Tracking Pattern, page 2, area #13 assignments read across as follows: Brooke for kindergarten through third, Brooke for grades fourth through sixth, Martin Jr. High School for grades seventh and eighth, and Johnston High School for ninth through twelfth.

The numbers under the school names refer to the grid locations on the map, and they show the physical location of the school itself. For example, Brooke Elementary is at grid location ML-21 (it can be seen as a small open square next to the area number "13" on the map).

2. If you want to find out what area you must live in to attend a particular school, locate the school of interest by reading down the appropriate grade column. The middle schools are listed under the columns headed "6" and "7-8"; the junior high schools are listed under the column headed "7-8"; and the high schools are listed under the "9-12" column. Please note, however, that the schools are not listed alphabetically. Because each of these schools has a number of areas making up its district, they will be listed more than once within the grade columns. Once you find the school you are interested in, read to the left hand margin to find the area number(s). Turn to the map and locate the area number(s) to see what parts of the District are assigned to that particular school.

For example, in order to be able to attend Anderson High School (located at grid MH-31) on the map), one can live in any of the following area 24, 35, 57, 58, 71, 72, 135, 171, 172, 221, or 271. These numbers can be found by reading down the high school grade column (9"-12") to each place where Anderson is listed, then noting the corresponding area number to the left of that line.

3. The boundaries shown on the Assignment Area Map may not always be completely precise. If you live (or intend to live) near a boundary, please call the office of Student Services to verify the tracking (assignment) pattern.

Please feel free to call to verify the assignment for any specific street name and house number.
