MATRIX SIMPLER SEARCHES UPDATE

MATRIX UPDATE!

The flow of MLS data starts from listing input, so we knew this was the time to not only clean up the data on the back end but also enhance the user experience on the front end by making your Add/Edit experience easier. For example:

- *Subscribers will now have a "Save as Incomplete" button, so you never have to worry about submitting your listing prematurely, again.*
- *Tired of hitting your 500-character limit? No sweat! Now, you'll be able to enter up to 2,000 characters in the Agent Remarks field.*
- *Need an additional field for "Showing Instructions?" You've got it!*
- *And, say goodbye to never-ending scroll boxes and hello to complete lists of input options. That means one less click for you!*

Although search options will not change too much, there will be some minor changes. The most noticeable of which will include an update to a few of our MLS statuses. For example:

- *Active Contingent (AC) and Pending Taking Backups (PB) will now be merged into one status: Active Under Contract (AU).*
- *Subscribers will also notice that Sold (S) and Leased (L) will go away and Closed (C) will take its place, respectively.*
- *Similarly, Temporarily Off Market (T) will become Hold (H).*

WHEN:

THURSDAY, SEPTEMBER 17
1:00 PM - 2:30 PM

WHERE:

ONLINE ZOOM MEETING
I WILL SEND THE LINK TO JOIN THE CLASS
AFTER YOU ARE SIGNED UP!
